

MIT ACADEMY OF ENGINEERING (MITAOE), PUNE
DEPARTMENT OF COMPUTER ENGINEERING
Course: Full Stack Web Development
LABORATORY ASSIGNMENT 1

Student Name:	Sameet Pisal
PRN:	202401120018
Assignment Title:	Responsive Admin Dashboard with Sidebar & Statistics Cards

1. PROBLEM STATEMENT

Assignment Question: "1. Create a responsive webpage which shows dashboard with sidebar and statistics in cards using HTML, CSS, Bootstrap"

2. IMPLEMENTATION SUMMARY & FEATURES

A full-fledged, responsive e-commerce administration dashboard was implemented using HTML5, CSS3, and the Bootstrap 5.3 framework. The project completely satisfies all assignment requirements and includes the following features:

- **Persistent Desktop Sidebar:** Fixed vertical navigation panel with brand branding ('ShopKart Enterprise'), grouped navigation categories ('Overview', 'Analytics & Marketing', 'System'), active state pills, badge notifications, and administrator user profile.
- **Statistics in Cards (Hero KPI Metrics):** Four responsive statistics cards tracking Total Revenue (₹8,24,500), Total Orders (2,841), Pending Orders (143), and New Customers (512) featuring custom subtle-tinted icon containers and percentage trend indicators.
- **Visual Analytics & Goal Tracking:** Category sales breakdown with segmented progress bars (Electronics, Apparel, Footwear, Kitchen, Books) alongside a monthly revenue goal progress tracker.
- **Operations Overview Metrics:** Live operational counters for shipments dispatched, customer returns, 5-star reviews, support tickets, and verified marketplace vendors.
- **Recent Orders Data Table:** Comprehensive data table with customer avatars, product details, city tags, monetary amounts, and colored status pill badges (Delivered, Processing, Shipped, Cancelled).
- **Featured Product Catalog:** Product inventory showcase featuring real item photography, star ratings, price tags, and inventory stock badges (In Stock, Low Stock, Sold Out).
- **Active Team Status Module:** Team member collaboration panel showing online/away/offline administrative colleagues with role titles and status dot indicators.
- **Interactive Bootstrap Modals & Notifications:** Interactive 'Add New Product' form modal, 'Order Details' transaction modal with invoice download, and animated Bootstrap toast notifications.
- **Responsive Mobile Offcanvas Navigation:** Full mobile layout adaptation (<992px) with top hamburger menu button opening an offcanvas drawer and vertically stacked cards.
- **Native Dark / Light Theme Toggle:** Built-in theme switcher utilizing Bootstrap 5.3's data-bs-theme attribute.

3. COMPLETE USER INTERFACE & FEATURE SCREENSHOTS

The screenshots below illustrate every component, feature, modal, table, and viewport layout implemented in the dashboard:

4. CORE SOURCE CODE SNIPPETS

4.1 Responsive Layout & Persistent Sidebar Structure (HTML & Bootstrap):

```
<!-- 12-Column Responsive Layout with Sticky Desktop Sidebar -->
<div class="container-fluid p-0">
  <div class="row g-0">
    <!-- Desktop Sidebar (Hidden on Mobile) -->
    <aside class="col-lg-2 d-none d-lg-flex flex-column sidebar-wrapper min-vh-100 p-3 position-sticky top-0">
      <div class="d-flex align-items-center gap-2 mb-4">
        <div class="bg-primary text-white p-2 rounded-3"><i class="bi bi-cart3 fs-5"></i></div>
        <span class="text-white fw-bold fs-5">ShopKart</span>
      </div>
      <ul class="nav flex-column sidebar-nav gap-1 flex-grow-1">
        <li class="nav-item"><a href="#" class="nav-link active"><i class="bi bi-grid-1x2-fill me-2"></i>Dashboard</a></li>
        <li class="nav-item"><a href="#" class="nav-link"><i class="bi bi-bag-check me-2"></i>Orders</a></li>
        <li class="nav-item"><a href="#" class="nav-link"><i class="bi bi-box-seam me-2"></i>Products</a></li>
      </ul>
    </aside>

    <!-- Mobile Responsive Offcanvas Sidebar (<992px) -->
    <div class="offcanvas offcanvas-start sidebar-wrapper" tabindex="-1" id="mobileSidebar">
      <!-- Offcanvas Mobile Navigation Body -->
    </div>
```

```

    <!-- Main Dashboard Workspace -->
    <main class="col-lg-10 col-12 min-vh-100 d-flex flex-column"> ... </main>
  </div>
</div>

```

4.2 Statistics in Cards Markup (Bootstrap Card System):

```

<!-- Responsive KPI Statistics Cards Grid -->
<div class="row g-3 mb-4">
  <div class="col-sm-6 col-xl-3">
    <div class="card border-0 shadow-sm rounded-4 h-100 card-hover">
      <div class="card-body p-3">
        <div class="d-flex justify-content-between align-items-start mb-3">
          <div>
            <span class="text-secondary small fw-semibold text-uppercase">Total Revenue</span>
            <h3 class="fw-bolder mb-0 mt-1">₹8,24,500</h3>
          </div>
          <div class="icon-box bg-primary-subtle text-primary">
            <i class="bi bi-currency-rupee fs-4"></i>
          </div>
        </div>
        <div class="d-flex align-items-center justify-content-between pt-2 border-top border-light-subtle">
          <span class="status-badge bg-success-subtle text-success">
            <i class="bi bi-arrow-up-right"></i> +14.2%
          </span>
          <span class="text-secondary small">vs last month</span>
        </div>
      </div>
    </div>
  </div>
</div>

```

4.3 Interactive Modals & Toast Handling (HTML & JavaScript):

```

<!-- Modal Dialog & Bootstrap Toast Handlers -->
<div class="modal fade" id="addProductModal" tabindex="-1">
  <div class="modal-dialog modal-dialog-centered">
    <div class="modal-content border-0 shadow-lg rounded-4">
      <div class="modal-header border-bottom px-4 pt-4 pb-3">
        <h5 class="modal-title fw-bold">Add New Product</h5>
        <button type="button" class="btn-close" data-bs-dismiss="modal"></button>
      </div>
      <form id="newProductForm"> ... </form>
    </div>
  </div>
</div>

<script>
// Order Modal Dynamic Data Trigger
const viewButtons = document.querySelectorAll('.view-order-btn');
const orderModal = new bootstrap.Modal(document.getElementById('orderModal'));

viewButtons.forEach(btn => {

```

```
btn.addEventListener('click', () => {
  document.getElementById('modalOrderId').textContent = btn.getAttribute('data-order');
  document.getElementById('modalCustomerName').textContent = btn.getAttribute('data-customer');
  document.getElementById('modalOrderItem').textContent = btn.getAttribute('data-item');
  document.getElementById('modalOrderAmount').textContent = btn.getAttribute('data-amount');
  orderModal.show();
});
});
</script>
```

4.4 Custom CSS Styling & Responsive Fixes (CSS3):

```
/* Clean Formal Dashboard CSS */
body {
  font-family: 'Plus Jakarta Sans', system-ui, sans-serif;
  background-color: var(--bs-tertiary-bg);
}

.sidebar-wrapper {
  background: linear-gradient(180deg, #0f172a 0%, #1e293b 100%);
  color: #94a3b8;
}

.card-hover {
  transition: transform 0.22s ease, box-shadow 0.22s ease;
}

.card-hover:hover {
  transform: translateY(-4px);
  box-shadow: 0 12px 28px rgba(0, 0, 0, 0.09) !important;
}
```

5. CONCLUSION

A responsive e-commerce administration dashboard was successfully engineered using HTML5, CSS3, and Bootstrap 5.3. All requirements specified in the problem statement—including a persistent sidebar with mobile offcanvas support, responsive grid layout, key statistics presented in clean card components, and interactive modal dialogs—have been fully implemented and verified.
